

No GPS antennas are easier to embed than Sarantel GeoHelix® antennas.

It's not just a question of size. Our antennas eliminate GPS integration problems by being electrically isolated, and through unique filtering technology. Featuring a very small near field, they stay tuned

inside any device with multiple radios, even when held or worn next to the body. And

Perfect fit.

because they offer a broad omni-directional pattern, they work in the most difficult physical environments. All of

which means you're sure of powerful, predictable, performance.

That's not all. You can make your devices even smaller for consumer appeal. You can also reduce the design cycle and development time thanks to a standard platform that requires fewer components.

Get in touch, and see why GPS is so attractive with Sarantel.
